

Green House Designs - Detailed Design Process

Kitchen/Bath Design Only

STEP 1 Discovery Phase:

Discovery Call: Client completes the questionnaire and books the call. We have the Discovery call and then client pays a deposit for the consultation.

STEP 2 Consultation:

Initial Consultation: A meeting on site at the client's home to measure the space and assess client's needs. During this meeting, we will discuss your budget, functional requirements, and style preferences.

Consultation Report: Within 5 days of the consultation we will send a comprehensive report with our suggestions and recommendations on how best to proceed with your space. We will also recommend the Design Package we feel fits your project best. Our goal is to match you with the design service that fits your personal needs so that we can get started on building your dream space.

STEP 3 Design:

Design Plan: Two to Three weeks after our consultation I will deliver a design plan based on our meeting. The plan will be tailored to your specifications, style ideas, and design goals. My goal is to present a unique design with as much detail as possible, which will allow you to execute the purchasing, installation, and project management of your renovation.

Follow Up: After you've received your design, you'll have the ability to follow-up with us over one email to answer any questions you have about your Design Plan. We can make **one revision** to our floor plan and rendering(s) if you wish to see something laid out differently.
